

## Future Outlook and Opportunities for E-Mobility in Malaysia

Prime Minister Datuk Seri Anwar Ibrahim's recent visit to China has been hailed as a major success, with the announcement of record investment commitments worth RM170bil from China. This move sends a strong positive signal to international investors and further boosts economic ties between the two countries. As part of the announcements made during the visit, two Chinese companies, Zhejiang Geely Holding Group Co and Rongsheng Petrochemical Co, are set to visit Malaysia by next month to begin work on their respective projects... read more

Geely, in particular, has announced that they will invest RM30 billion in Tanjung Malim, Perak, opening up a new chapter in the electric vehicle (EV) ecosystem in Malaysia. This investment will encompass the automotive and mobility value chain, from high-tech global research and development centres to related support services... read more

These developments are set to bring about exciting new opportunities for Malaysia's economy and strengthen its position in the global market, particularly in the EV industry. With these new investments and projects, Malaysia is poised to become a major player in the global EV market.

Discover the latest in Southeast Asia's EV industry at E-Mobility Asia (EMA) 2023. Supported by Electric Vehicle Association of Malaysia (EVAM), the event showcases the latest electromobility offerings and industry trends, while helping preserve the environment with increased adoption of electric vehicles.
