

## Powering the Future of E-mobility

The need to go green and mitigate the effects of climate change is increasing, and electric vehicles (EVs) are the latest growing trend in green transportation for many countries worldwide. Now, the EV market has begun to establish its roots in Malaysia, and it is on its way to becoming the latest e-mobility hub in Southeast Asia, with EVs potentially becoming viable alternatives to petroleum-run vehicles for everyone in the near future.

E-Mobility Asia (EMA) is Malaysia's latest international event dedicated to environmentally friendly and sustainable electromobility offerings. With the support of Electric Vehicle Association of Malaysia (EVAM) as a strategic partner, the event marks the latest addition to shows paving the way forward for electric vehicles and their trends and opportunities.

**Dato' Dennis Chuah**  
Chairman, EVAM

"We are pleased to be the esteemed strategic partner for E-Mobility Asia as the event plays a pivotal role in leading the nation towards an electric future. We're highly thankful for all our partners and supporters, and we will be organising a highly anticipated conference during the event. We hope that EMA will give the EV sector the push it needs both in the market and among the people".

## Why Exhibit?

- 

**Network and generate leads**  
Meet and engage with industry players, decision makers, and representatives from local and abroad. Forge meaningful connections and uncover the best opportunities for business.
- 

**Showcase your products & solutions**  
Exhibit and demonstrate your latest innovations and offerings to the right audiences from the public and private sectors. Reap the benefits of showcasing alongside major industry players.
- 

**Brand-building opportunities**  
Position your brand at the heart of Southeast Asia's leading e-mobility show where you can generate publicity and benefit from all the exposure you'll ever need.

Be part of our exhibitor to showcase your latest innovation and offerings!
