

## The Largest Automotive & Next-Gen Mobility Expo of the Year!

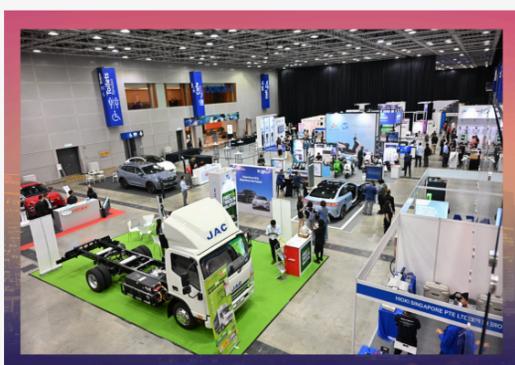

E-Mobility Asia 2025 (EMA), now expanded into the **Global Automotive and Technology Expo (GATE)** — is an unparalleled platform of bringing together innovators, decision makers, and industry leaders shaping the future of mobility and automotive technology.

Building on the success of EMA, this year’s event has evolved into GATE, embracing a broader spectrum of innovations in electric vehicles, autonomous driving, smart manufacturing, automotive parts and components and cutting-edge automotive technology.

GATE is a premier event for industry leaders, manufacturers, and suppliers to connect, share knowledge, and explore new business opportunities featuring automotive technology innovations, sustainability initiatives, industry insights, and digitalisation.

GATE, co-organised by **Malaysia Automotive, Robotics & IoT Institute (MARii)**, and endorsed by **Ministry of Investment, Trade, and Industry (MITI) Malaysia**, focuses on green transportation and electromobility. The event will bring together government officials, industry experts, and practitioners to discuss sector growth and strengthen regional efforts. It will feature a dynamic program of conferences, exhibitions, forums, seminars, networking events, and B2B meetings, all designed to foster collaboration, drive innovation, and accelerate the adoption of next-generation mobility solutions for a smarter, greener, and more sustainable automotive future.
